PROFILE

Computer Science undergraduate at the University of Westminster with hands-on experience building full-stack web applications using React, FastAPI, Flask, MongoDB, and Firebase. Proficient in Java, Python, and JavaScript with exposure to CI/CD pipelines, AWS cloud platforms, and Node.js. Developed two end-to-end projects including an AI-powered study planner and a full-stack appointment booking system. Seeking a Software Engineering Internship to contribute technical skills in an agile, collaborative environment.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript
- **Frontend & Runtime:** React, HTML5, CSS3, Node.js
- **Backend Frameworks:** FastAPI, Flask, REST API Design
- **Databases:** MongoDB, Firebase (Firestore & Authentication)
- **Version Control:** Git, GitHub (branching, merging, pull requests, version control)
- **Cloud & DevOps:** AWS (EC2, S3), CI/CD Pipelines, Cloud Deployment (Vercel, Render)
- **Concepts:** OOP, REST APIs, Data Structures, Machine Learning (fundamentals)

PROJECTS

Appointment Booking System | (Full-Stack Solo Project) | [GitHub Link](#)

- Built a full-stack appointment booking application with a React frontend and FastAPI (Python) backend, persisting data in MongoDB.
- Designed and implemented RESTful APIs following REST API best practices for CRUD operations on booking data.
- Built a responsive, component-driven UI in React for a seamless cross-device user experience.
- Performed end-to-end API testing and debugging to ensure system reliability and data integrity.
- Managed codebase using Git with structured branching, commits, and version control best practices.

AI Personalized Study Planner | (SDGP Group Project) | [scheduler.it.com](#)

- Developed a responsive frontend using React with modular components including dashboard, study planner, and task management features
- Integrated frontend with Flask backend using REST APIs for efficient data communication
- Implemented a rule-based scheduling system to generate personalized study plans based on user inputs (deadlines, difficulty, study hours)
- Used Firebase for authentication and user data management
- Performed API testing using Postman and debugging to ensure system reliability
- Explored CI/CD deployment strategies using cloud platforms for production readiness.
- Used GitHub for version control, including branching, merging, and managing collaborative development in a team environment

Web Development Project

- Built a fully responsive website from scratch using semantic HTML5, CSS3, and vanilla JavaScript.

CERTIFICATIONS

- **Python Essential Training** - LinkedIn Learning, 2025
- **Responsive Web Design** - freeCodeCamp, 2025
- **Web Application Development** - NIBM Certificate Course 2026
- **Introduction to Prompt Engineering for Generative AI** - LinkedIn Learning, 2025
- **Crash Course: AWS Basics** - KodeKloud, 2026
- **Artificial Intelligence Foundations: Machine Learning** - LinkedIn Learning, 2026

EDUCATION

University Of Westminster | 2025-2028

Bachelor of Science(Hons) in Computer Science

Relevant coursework:

- Web Development (HTML, CSS, React)
- Object Oriented Programming JAVA
- Algorithm Theory design and Implementation
- Machine Learning and Data Mining

VOLUNTEER EXPERIENCE

- Volunteer – Dil Se Event, Rotaract Club of IIT (Assisted with event logistics with the team and participant engagement.)
- IEEE Vertex Logistics Volunteering

ACHIEVEMENTS

Code Rally Competition – Intermediate Tier Participation Certificate

- Engaged in a competitive coding event, showcasing problem-solving and programming skills.

IEEEExtreme Hacksphere 25" Competition – Participation Certificate

- Gained exposure to innovative tech projects and emerging technologies.
